This presentation contains forward-looking statements that provide our expectations or forecasts of future events such as new product introductions, product approvals and financial performance.

Such forward-looking statements are subject to risks, uncertainties and inaccurate assumptions. This may cause actual results to differ materially from expectations and it may cause any or all of our forward-looking statements here or in other publications to be wrong. Factors that may affect future results include interest rate and currency exchange rate fluctuations, delay or failure of development projects, production problems, unexpected contract breaches or terminations, government-mandated or market-driven price decreases for Lundbeck's products, introduction of competing products, Lundbeck's ability to successfully market both new and existing products, exposure to product liability and other lawsuits, changes in reimbursement rules and governmental laws and related interpretation thereof, and unexpected growth in costs and expenses.

Lundbeck undertakes no duty to update forward-looking statements.

Certain assumptions made by Lundbeck are required by Danish Securities Law for full disclosure of material corporate information. Some assumptions, including assumptions relating to sales associated with products that are prescribed for unapproved uses, are made taking into account past performances of other similar drugs for similar disease states or past performance of the same drug in other regions where the products are currently marketed. It is important to note that although physicians may, as part of their freedom to practice medicine in the U.S., prescribe approved drugs for any use they deem appropriate, including unapproved uses, at Lundbeck, promotion of unapproved uses is strictly prohibited.
Lundbeck saw strong progress against **Expand and Invest to Grow** strategy

- Strategic brands grew 28% in 2019 with long-term predictable growth
- Two acquisitions expand the indications within neuroscience and add to the pipeline across all phases of development
- Lundbeck La Jolla Research Center created: Establishing a strong platform for innovation
- Lundbeck Seattle BioPharmaceuticals builds antibody capabilities
- 8 projects progressed or were added to the pipeline since February 2019
- Solid, stable cash generative base business
- Solid profitability while investing in future growth
HIGHLIGHTS AND STRATEGY UPDATE

Lundbeck returned to growth in Q4 2019

- Onfi erosion rate flattens, enabling Lundbeck to return growth in Q4 2019
- Core EBIT-margin reached 21.9% in Q4 2019 vs 22.2% in Q4 2018 despite investments in commercial infrastructure and added operational costs related to Lundbeck Seattle
Continued excellence in commercial execution delivers double-digit revenue growth in all regions for the four strategic brands.
2019: A transition year - The strength of our strategic brands significantly mitigates Onfi LoE

- Focus on maximizing existing brands has successfully driven strong growth
- Y/Y revenue decline driven solely by genericization of U.S. neurology products
  - Excluding these products, revenue up by 18%
- Future growth less impacted by decline in mature brands
- Lundbeck ready for a new growth phase
Eptinezumab: On a path towards launch and global roll-out

- November: Lundbeck Seattle Biopharmaceuticals organization in place
- November 2019: Initiation of RELIEF study
- January 2020: U.S. sales reps hired

- U.S. PDUFA: 21 February 2020
- February 2020: Submission in Canada

A positive outcome of the foliglurax phase IIa AMBLED study can result in milestone payments of up to EUR 100 million in 2020. A milestone payment of EUR 25 million is payable if primary and key secondary endpoint are met and an additional EUR 75 million is payable if improvement in OFF time exceeds two hours. A negative outcome of the study might result in a write-down of the product rights whereby EUR 100 million will be recognized in the income statement.
